

The precise details of our program are still being worked out and will be [available here](#) when available.

If you require an outline of the program, particularly to accommodate leave requests, we have created a skeleton of the program below, and a description of the meeting overall.

You can also access the [previous year's program here](#) as our annual events are reasonably similar format and calibre of educational content.

The TOGA Annual Scientific Meeting to be held at the Brisbane Conference and Education Centre in 2025, is a bi-national meeting featuring a variety of international and local experts presenting topical issues in thoracic cancer research and management, and updates on TOGA clinical trials. As the only annual bi-national meeting catering for all clinical disciplines treating lung cancer and mesothelioma, we pride ourselves on delivering continuing and high-quality education to healthcare professionals and other people in the lung cancer community to ensure every person diagnosed with a thoracic cancer receives optimal care.

Wednesday 30 July
